Webasto or Eberspacher Water Heater Selection Guide.

Using the water heater selection tool you can determine the correct water heater for your boat. This should only be used as guidance, bespoke marine heating kits can be created to meet your individual requirements, whether you need additional heater matrices for blown air heating as well as domestic water or you would like to discuss possibilities for your installation. This can all be done.

Eberspacher
Hydronic 5

What's the best water heating system for my boat?

1. Select the length corresponding to your boat.
2. From there, trace a line to the left until you come to the line corresponding to the waters in which you plan to operate.
3. From there, trace a line vertically downwards until you come to the line corresponding to the season in which you plan to operate.
4. From there, trace a line to the right: Select the line corresponding to your type of boat in the lower section and then trace a line vertically downwards – that's the recommended system.
