Webasto or Eberspacher Air Heater Selection Guide.

Using the air heater selection tool you can determine the correct heater for your boat. This should only be used as guidance, bespoke marine heating kits can be created to meet your individual requirements, whether you need additional ducting, outlets and therefore “Y” Branches and “T” Pieces or you would just like to replace the controller that comes as standard in the kit to something different. This can all be done.

EBERSPÄCHER AIRTRONIC – SELECTION GUIDE
