Contents

Description	Quantity
Blue Fuel Line Metre	2
7.5 x 4.5 Reducing Elbow	1
Fuel Hose Small	1
9mm Fuel Hose Clip	3
11mm Fuel Hose Clip	1

NOTE | The Fuel Tank **MUST** be lowered to access fuel port

Lower the fuel tank to access the auxiliary fuel port

There is no need to remove the sender unit from tank.

(Figure 1) Tank Fuel port or (Figure 2) Transit sender Port depending on model and year.

Cut the tip off the fuel port nipple to open the port enough to feed in the blue fuel line

Assemble the Kit as per Figure 4. Securing the line at smallest end A with clip provided to correct length of dip line a 175mm and cut end of dip pipe at 45 degrees

Once assembled feed the blue line through the fuel port and attach the elbow end B (largest end) over the fuel port and secure using provided clip

Feed the Remaining line to the fuel pump and secure using the remaining rubber hose and clip.
